Summary

Senior Product Designer with experience spanning product strategy, systems thinking, interaction design, and AI-assisted frontend development. I enjoy making sense of complex systems, aligning teams around a shared direction, and working from big product questions down to the smallest interaction and visual details.

Expertise

Product Strategy
0→1 Product Development
Systems Thinking
Interaction Design
Visual Design
Design Systems
User Research
AI-Assisted Prototyping
Frontend Development

Education

University of Utah
B.S. Parks, Recreation & Tourism

Smartsheet • Senior Product Designer

Apr 2023 – Present

- Spearheaded the 0→1 design and frontend development of Markdown-based Pages, Smartsheet's fourth core asset type, introducing AI-compatible semantic content to expand AI-driven workflows and support consumption-based pricing.
- Led the design of Reports modernization, redefining its interaction model, shaping a phased release strategy, and aligning three teams and leadership around a shared product direction adopted in the annual roadmap.
- Contributed to bringing Control Center, a ~$64M ARR enterprise offering, into core Smartsheet as a native project and portfolio management solution.
- Partnered with sales and product leadership to define the vision for a 0→1 Scenario Planning experience, allowing teams to model resource capacity and project demand before committing to a plan.
- Defined the vision for transitioning Resource Management from sales-assisted onboarding to self-serve adoption, designing a trial experience that simplified setup through bulk data import.
- Led the design of Resource Management reporting integration into Smartsheet, mentoring a junior designer through delivery and protecting ~$1.15M in ARR from at-risk customer renewals.

Smartsheet • Product Designer

Mar 2022 – Apr 2023

- Designed the integration of Resource Management workload planning into Smartsheet, bringing capacity insights directly into the core Sheet experience.
- Adapted Resource Management for localization, establishing responsive design patterns that supported expansion into seven international markets.
- Established Resource Management's first component-based Figma design system, replacing screenshot-based documentation with reusable components that accelerated design and development workflows.

KPMG • Product Designer

Feb 2020 – Mar 2022

- Established the design foundation for American Modern's digital transformation, securing executive alignment on a new visual direction and creating 30 reusable page templates and a 121-component design system.
- Led MVP design for MetLife Mexico's first centralized agent platform, unifying client, policy, sales, and performance workflows.
- Conceived a digital product for the oil and gas sector, translating an emerging market opportunity into a product vision that generated 13 client demos and validated customer interest.
- Designed mobile experiences for KPMG's Restarting America initiative, contributing to solutions for the University of Colorado, PGA, LPGA, and Milwaukee Bucks.
